Please let me know your timing on this for ordering, we need to make some changes to our budget if you order through us. Also, when and where you are planning on holding the training session.

I think this email from September answers all of the questions you asked the other day.

Tami

Subject: FDT machine

Hi Greg,

We use the Humphrey Systems FDT through Zeiss.

Prevent Blindness Wisconsin would provide the training. We require a minimum of 10 to conduct a training session. The class takes about 2 hours, we provide the guide books as well.

Here is some information about ordering.

If they place the order with you, and you place the order with me, we can ship it directly to them, and bill you. The total cost is \$4740, for the machine, case and shipping.

If they just want to order directly from Carl Zeiss Meditec, I'm not sure what their cost would be. Their number is 847-486-7473.

Please let me know if you have additional questions.

Thank you,

Tami Radwill
